

# Eco AI Report - Score 6/10

## Question

how sustainable is my pepsi zero

**Eco Score: 6/10**

## Explanation

Pepsi Zero's sustainability depends on factors like packaging, ingredients, and transportation. While it avoids sugar (reducing agricultural impact), plastic bottles are a concern, as only 9% of global plastic is recycled. Choosing aluminum cans or ensuring you recycle the bottle boosts its sustainability.

## Alternatives

Beverages

Packaging

Recycling
