

Eco AI Report - Score 6/10

Question

how sustainable is my pepsi zero

Eco Score: 6/10

Explanation

Pepsi Zero avoids sugar, but its sustainability depends heavily on packaging and production practices. If served in single-use plastic bottles, it scores lower due to resource use and emissions since plastic production is energy-intensive. Opt for aluminum cans or make sure to recycle your bottle to improve its impact.

Alternatives

Food & Beverage

Packaging

Recycling
