

Eco AI Report - Score 5/10

Question

is my PEPSI ZERO SUSTAINBLE

Eco Score: 5/10

Explanation

Pepsi Zero, like many bottled beverages, has a carbon footprint related to production, transport, and packaging. Plastic bottles often contribute to plastic pollution and rely on fossil fuels, which could be more sustainable if sourced from recycled or plant-based materials. Opting for glass, aluminum cans, or reusable options can improve sustainability.

Alternatives

Plastic Packaging

Beverages

Circular Economy
