

Eco AI Report - Score 6/10

Question

is my gucci bag sustainable

Eco Score: 6/10

Explanation

Gucci has made commitments to sustainability, such as using more sustainable materials and achieving carbon neutrality in its operations. However, luxury goods often have a high carbon and resource footprint, particularly if made of animal leather, which contributes to deforestation and emissions. A sustainable choice is to extend your bag's life by maintaining it well or considering pre-owned options in the future.
