

Eco AI Report - Score 8/10

Question

what should i do about my energy costs

Eco Score: 8/10

Explanation

Rising energy costs can often be mitigated by improving energy efficiency at home. Simple steps like switching to LED bulbs, sealing drafts, and using a programmable thermostat can lower your energy consumption and bills. Consider investing in renewable options like rooftop solar or joining a green energy program to reduce dependence on fossil fuels.

Alternatives

Energy efficiency

Renewable energy

Cost saving
