

Eco AI Report - Score 8/10

Question

is recycling good

Eco Score: 8/10

Explanation

Recycling is good as it helps reduce waste, conserve natural resources, and cut emissions—recycling aluminum, for instance, saves up to 95% of the energy required for new production. However, it has limitations like contamination and downcycling, so reducing and reusing should be prioritized over recycling for greater sustainability.

Alternatives

Recycling

Circular Economy

Waste Management
